

MAXIBRIGHT Mk2 POWER PACK (250W, 400W & 600W)

Congratulations ! You now have the best quality power pack money can buy. Before you switch on any part of the lighting system, please make sure you get the most from the unit by taking a minute to read this important information.

Safety Advice

- Electricity can kill, so always use a circuit breaker with this product.
- Before doing anything with the unit, make sure that the power supply is disconnected.
- After switching off the unit, allow the unit to discharge by leaving it plugged in for at least 3 minutes.
- Keep away from children and pets.
- The lamp will get hot during use. If the lamp has been on, leave it to cool for at least 30 minutes before touching it and never touch the lamp while it is switched on !
- Never switch the unit on without a reflector and lamp plugged in to it.
- Make sure you use a reflector and lamp that is compatible with the unit.
- Never tamper with the unit as there are no user serviceable parts inside and this will void the guarantee.

Installation

Place the ballast on a sturdy surface. Make sure any protective plastic coverings on the reflector are removed before switching on the system.

To prolong the life of the lamp, always allow the lamp to fully warm up for 5 minutes before switching it off; after switching the unit off, leave the unit off for at least 15 minutes before switching it back on again. It is important that the lamp is free from smears, fingerprints etc. Wipe with a clean dry cloth before use.

Mount the reflector in a suitable position then screw the lamp into the reflector's socket firmly to ensure a good electrical contact. Plug the reflector into the ballast, ensuring the connectors are firmly pushed together. Switch on the power to the unit (for timer ballasts, refer to the timer instructions for operation) and within 30 seconds, the lamp will ignite and after 5 minutes illuminate to full brightness.

Troubleshooting

If the system fails to start, then switch it off, wait 30 minutes for the lamp to cool and then remove it and screw it back in again firmly. Switch the unit back on and if the lamp still fails, contact your supplier.

Guarantee

In the unlikely event that you find fault with this product, please contact your supplier. Maxibright Mk2 power packs carry a 3 year guarantee (terms & conditions apply), excluding faulty fuses and tampering.
